An introduction to the ECMS

January 2020

target | ECMS
services

A single, unified collateral management system

The Eurosystem Collateral Management System will replace the 19 local collateral management systems of the NCBs in operation today.

Go-live is planned for **November 2022**.

Before the ECMS:

19 collateral
management systems

From November 2022 onwards:

1 unified
system

The ECMS – key aspects

The ECMS will work together with the other TARGET services to ensure that cash, securities and collateral flow freely across Europe.

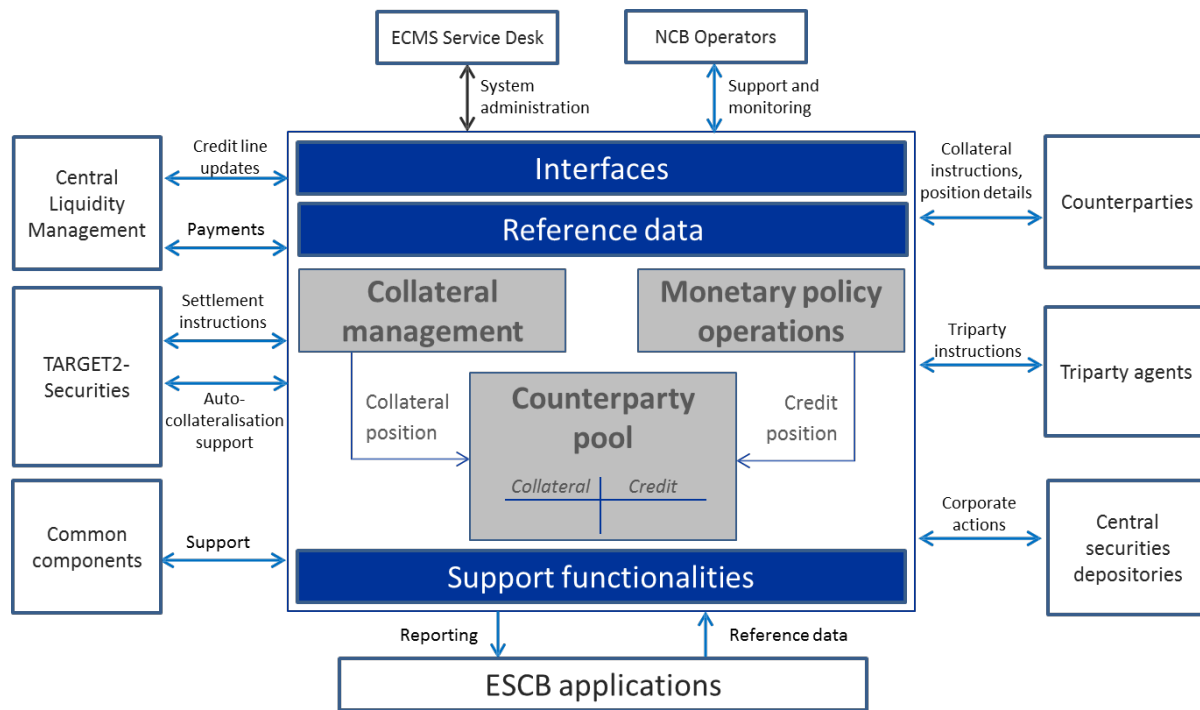

The ECMS keeps track of the individual collateral and credit positions of counterparties belonging to the Eurosystem national central banks.

The ECMS calculates the credit line available to each counterparty and send this information to the central liquidity management tool (CLM).

The ECMS converts counterparties' (de-) mobilisation instructions into settlement instructions which are sent to and settled in TARGET2-Securities (T2S).

Interaction of the ECMS with the outside world

The ECMS interacts with many other services to provide Eurosystem NCBs and their communities with common functionality for managing marketable assets and credit claims used as collateral in Eurosystem credit operations.

Benefits of the ECMS

Harmonisation
of collateral
management
practices

Efficiency

NCBs, their counterparties and other relevant actors to
operate on one single system with a single interface.

Integration
within the Eurosystem's
market infrastructure
landscape (T2 and T2S).
