## PRESS RELEASE

## Euro area MFI interest rate statistics: August 2012

In August 2012 the euro area composite interest rate for loans to and deposits from non-financial corporations as well as households decreased.

## Most significant MFI interest rates on new business loans to, and deposits from, nonfinancial corporations:

August 2012 saw a decrease in the cost of new borrowing by non-financial corporations both for small loans and for loans of over $€$ I million. For example, the interest rate on new loans over $€ 1$ million with a floating rate and an initial rate fixation period of up to three months decreased by 18 basis points from the previous month to stand at $2.05 \%$. This month-on-month decrease was driven by the interest rate effect which outweighed changes in the corresponding weights: 14 and 4 basis points respectively. The corresponding rate for new loans of the same size with an initial rate fixation period of over ten years decreased by 49 basis points to stand at $3.01 \%$. The month-on-month decrease was driven by the interest rate effect which accounted for 34 basis points of the change. In the case of new loans up to $€$ 250,000 with a floating rate and an initial rate fixation period of up to three months, the average rate charged remained basically unchanged at $4.84 \%$. As regards new deposit agreements, the interest rate on deposits from non-financial corporations with an agreed maturity of up to one year stayed more or less constant at I.II\% in August 2012 (having stood at I.I4\% in July 20I2).

Most significant MFI interest rates on new business loans to, and deposits from, households:

In August 2012 the interest rate on new loans to households for consumption with a floating rate and an initial rate fixation period of up to one year rose by 3 basis points to stand at $5.79 \%$. This was driven by the interest rate effect which outweighed the corresponding weights. In the same period, the cost of new borrowing by households with regard to housing loans decreased. The interest rate on loans for house purchases with a floating rate and an initial rate fixation period of up to one year decreased by I5 basis points to stand at $2.94 \%$. Furthermore, the interest rate on loans with an initial rate fixation period of over ten years fell by 10 basis points to stand at 3.52\% in August 2012.

Rates agreed on new deposits from households saw mixed developments. The interest rate on deposits with an agreed maturity of up to one year fell by 14 basis points to stand at $2.66 \%$. Finally, the interest rate on deposits redeemable at three months' notice remained basically unchanged at $1.68 \%$ in August 2012.

* For this instrument category, the concept of new business is extended to the whole outstanding amounts and therefore it is not comparable with the business volumes of the other categories; households and non-financial corporations are merged and allocated to the household sector. Volume data derives from ECB MFI Balance Sheet Items Statistics.

## Notes:

[^0]statistics can be downloaded from the "MFI interest rates" part of the "Money, banking and financial markets" section of the ECB's Statistical Data Warehouse (see http://sdw.ecb.europa.eu). More detailed information on MFI interest rate statistics, including the release calendar, is available from the "Bank interest rates" part of the "Monetary and financial statistics" section of the ECB's statistics website (see http://www.ecb.europa.eu/stats).

- In this press release, loans are categorised on the basis of their initial rate fixation period - i.e. the period of time at the start of the contract during which the interest rate will not change. Floating rate is defined as the interest rate that is subject to revisions on a continuous basis or at the discretion of the MFI.
- For MFI interest rate statistics, "new business" refers to any new agreement between a customer and an MFI, while "outstanding amounts" refers to the stock of all deposits and all loans at a specific moment in time.
- In this press release "up to" means "up to and including".
- Interest rates on new business are weighted on the basis of the size of the individual agreements. This is done both by the reporting agents and when computing the national and euro area averages. Thus, in addition to changes in actual interest rates, changes in average euro area interest rates for new business also reflect changes in the weights of individual countries' new business for the instrument categories concerned. The "interest rate effect" and the "weight effect" presented in this press release are derived from the Bennet index, which allows month-on-month developments in euro area aggregate rates resulting from changes in individual country rates (the "interest rate effect") to be disentangled from those caused by changes in the weights of individual euro area countries' contribution (the "weight effect").
- In addition to monthly euro area MFI interest rate statistics for August 2012, this press release incorporates minor revisions to data for previous periods. Unless otherwise indicated, these euro area statistics cover the EU Member States that had adopted the euro at the time to which the data relate. Thus, these statistics include Greece as of January 2001, Slovenia as of January 2007, Cyprus and Malta as of January 2008, Slovakia as of January 2009 and Estonia as of January 201 I.

## Source: ECB MFI interest rate statistics.

1) In this table, 'up to' means 'up to and including'.
2) For these instrument categories, new business and outstanding amounts coincide. End-of-period data. These categories are not fully comparable as data are collected according to different regulations.
3) Data as of June 2010 may not be fully comparable with earlier data owing to methodological changes arising from the implementation of: (i) Regulations ECB/2008/32 and (ii) ECB/2009/7 amending Regulation ECB/2001/18.
4) Excludes revolving loans and overdrafts, and convenience and extended credit card debt.

## Source: ECB MFI interest rate statistics.

1) In this table, 'up to' means 'up to and including'.
2) Includes non-profit institutions serving households, with the exception of the item on sole proprietors and unincorporated partnerships, which is a breakdown of the household sector only.
3) For this instrument category, new business and outstanding amounts coincide. End-of-period rates.
4) Data as of June 2010 may not be fully comparable with earlier data owing to methodological changes arising from the implementation of: (i) Regulations ECB/2008/32 and (ii) ECB/2009/7 amending Regulation $\mathrm{ECB} / 2001 / 18$.
5) Excludes revolving loans and overdrafts, convenience and extended credit card debt.
6) The APRC covers the total cost of the loans. These total costs comprise both an interest rate component and other related charges (the cost of inquiries, administration, preparation of documents, guarantees, etc.)

1) In this table, 'up to' means 'up to and including'.
2) For this instrument category, new business and outstanding amounts coincide. End-of-period rates.
3) For this instrument category, households and non-financial corporations are merged and allocated to the household sector, since the outstanding amounts of non-financial corporations are negligible compared with those of the household sector in all participating Member States.

## Source: ECB MFI interest rate statistics.

1) In the above table 'up to' shall mean 'up to and including'.
2) The business volumes for all outstanding amounts indicators are derived from non-seasonally adjusted MFI balance sheet statistics.

[^0]:    - The first paragraph of the press release is based on the arithmetic average of MFI interest rates, weighted by new business volumes, for the following four categories: loans to and deposits from households, and loans to and deposits from non-financial corporations. The rest of the press release presents statistical information derived from a subset of the available MFI interest rate statistics. The full set of
