## PRESS RELEASE

## EURO AREA SECURITIES ISSUES STATISTICS: AUGUST 2008

The annual growth rate of the outstanding amount of debt securities issued by euro area residents increased from 7.1\% in July 2008 to $7.6 \%$ in August. For the outstanding amount of quoted shares issued by euro area residents, the annual growth rate was 0.8\% in August 2008, compared with 0.7\% in July.

New issuance of debt securities by euro area residents totalled EUR 859 billion in August 2008 (see Table I and Chart I). As redemptions came to EUR 775 billion, net issues amounted to EUR 84 billion (see Table I). Gross issuance and redemptions during August 2008 were lower than in previous months. Owing to a larger decrease in redemptions, the seasonally adjusted net issuance of debt securities for August was higher than in previous months (see Chart 2). The annual growth rate of outstanding debt securities issued by euro area residents increased from 7.I\% in July 2008 to $7.6 \%$ in August (see Table I and Chart 3).

As regards the sectoral breakdown, the annual growth rate of outstanding debt securities issued by nonfinancial corporations increased from $2.6 \%$ in July 2008 to $4.5 \%$ in August (see Table 2 and Chart 4). For the monetary financial institutions (MFIs) sector, this growth rate decreased from 8.5\% in July 2008 to $8.3 \%$ in August. The annual growth rate of outstanding debt securities issued by financial corporations other than MFls increased from $22.7 \%$ in July 2008 to $23.3 \%$ in August. For the general government, this growth rate increased from 2.1\% in July 2008 to $3.0 \%$ in August.

As regards the maturity breakdown, the annual growth rate of outstanding short-term debt securities decreased from $22.3 \%$ in July 2008 to $22.1 \%$ in August (see Table I and Chart 3). The annual growth rate of outstanding short-term debt securities issued by MFIs decreased from $30.2 \%$ to $26.9 \%$ during the same period (see Table 2). For long-term debt securities, the annual growth rate increased from $5.4 \%$ in July 2008 to $5.9 \%$ in August. The annual growth rate of outstanding long-term debt securities issued by MFls increased from $5.2 \%$ to $5.3 \%$ during the same period. The annual growth rate of outstanding fixed rate long-term debt securities increased from 3.0\% in July 2008 to $3.4 \%$ in August. The annual growth rate of outstanding variable rate long-term debt securities increased from II.8\% in July 2008 to $12.9 \%$ in August.

Concerning the currency breakdown, the annual growth rate of outstanding euro-denominated debt securities increased from $7.5 \%$ in July 2008 to $8.0 \%$ in August. For debt securities in other currencies, this growth rate increased from 3.8\% in July 2008 to $4.3 \%$ in August (see Table I).

The seasonally adjusted three-month annualised growth rate of outstanding debt securities issued by euro area residents increased from $9.5 \%$ in July 2008 to $10.7 \%$ in August (see Table 3 and Chart 5).

New issuance of quoted shares by euro area residents totalled EUR I. 7 billion in August 2008 (see Table 4). As redemptions came to EUR I. 5 billion, net issues amounted to EUR 0.1 billion. The annual growth rate of the outstanding amount of quoted shares issued by euro area residents (excluding valuation changes) was $0.8 \%$ in August 2008, compared with $0.7 \%$ in July (see Table 4 and Chart 6). The annual growth rate of quoted shares issued by non-financial corporations was $0.2 \%$ in August 2008, compared with $0.1 \%$ in July. For monetary financial institutions, it was $2.8 \%$ in August 2008, the same as in July. For financial corporations other than MFIs, this growth rate was $2.6 \%$ in August 2008, compared with $2.5 \%$ in July.

The outstanding amount of quoted shares issued by euro area residents totalled EUR 5,038 billion at the end of August 2008. Compared with EUR 6,618 billion at the end of August 2007, this represents an annual decrease of $23.9 \%$ in the value of the stock of quoted shares in August 2008, compared with an annual decrease of $26.3 \%$ in July, mainly due to market valuation changes.

Unless specified otherwise, data relate to non-seasonally adjusted statistics. In addition to the developments for August 2008, this press release may incorporate minor revisions to the data for previous periods. A complete set of updated securities issues statistics is available on the "Money, banking and financial markets" pages of the "Statistics" section of the ECB's website (http://www.ecb.int/stats/money/securities/html/index.en.html).These data, as well as euro area data in accordance with the composition of the euro area at the time of the reference period, can be downloaded using the ECB's Statistical Data Warehouse (SDW).

Data for the period up to August 2008 will also be published in the November 2008 issues of the ECB's Monthly Bulletin and Statistics Pocket Book. The next press release on euro area securities issues will be published on 17 November 2008.

1) Data coverage for euro area residents is estimated to be around $95 \%$ of total issuance
2) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.
3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.
)
she that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) Data coverage for euro area residents is estimated to be around $95 \%$ of total issuance
2) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial
corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S. 124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311);
other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314),
3) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.
4) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

Debt securities issued by euro area residents in all currencies, ${ }^{17}$ by issuing sector ${ }^{2)}$ and maturity, seasonally adjusted (EUR billions; nominal values)

3) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are most identical to seasonally adjusted annual rates.
