

13 April 2012

## PRESS RELEASE

### EURO AREA SECURITIES ISSUES STATISTICS: FEBRUARY 2012

*The annual growth rate of the outstanding amount of debt securities issued by euro area residents increased from 4.0% in January 2012 to 4.3% in February. For the outstanding amount of quoted shares issued by euro area residents, the annual growth rate was 1.6% in February 2012, compared with 1.7% in January.*

New issuance of debt securities by euro area residents totalled EUR 1,160 billion in February 2012. Redemptions stood at EUR 1,013 billion and net issues amounted to EUR 159 billion.<sup>1</sup> The annual growth rate of outstanding debt securities issued by euro area residents increased from 4.0% in January 2012 to 4.3% in February (see Table 1 and Charts 1 and 3).

The annual growth rate of outstanding short-term debt securities increased from 3.7% in January 2012 to 4.3% in February. For long-term debt securities, the annual growth rate increased from 4.0% in January 2012 to 4.3% in February. The annual growth rate of outstanding fixed rate long-term debt securities increased from 5.7% in January 2012 to 6.1% in February. The annual rate of change of outstanding variable rate long-term debt securities increased from -0.1% in January 2012 to 0.2% in February (see Table 1 and Chart 3).

As regards the sectoral breakdown, the annual growth rate of outstanding debt securities issued by non-financial corporations increased from 6.2% in January 2012 to 6.6% in February. For the monetary financial institutions (MFIs) sector, this growth rate was 4.5% in February 2012, compared with 4.3% in January. The annual rate of change of outstanding debt securities issued by financial corporations other than MFIs was 0.0% in February 2012, compared with -0.6% in January. For the general government, this growth rate increased from 5.7% in January 2012 to 6.1% in February (see Table 2 and Chart 4).

The annual growth rate of outstanding short-term debt securities issued by MFIs decreased from 19.6% in January 2012 to 16.8% in February. The annual growth rate of outstanding long-term debt securities issued by MFIs increased from 2.4% in January 2012 to 2.9% in February (see Table 2).

---

<sup>1</sup> As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

Concerning the currency breakdown, the annual growth rate of outstanding euro-denominated debt securities increased from 4.3% in January 2012 to 4.6% in February. For debt securities in other currencies, this growth rate increased from 1.4% in January 2012 to 2.0% in February (see Table 1).

New issuance of quoted shares by euro area residents totalled EUR 4.4 billion in February 2012. Redemptions came to EUR 2.3 billion and net issues amounted to EUR 2.1 billion. The annual growth rate of the outstanding amount of quoted shares issued by euro area residents (excluding valuation changes) was 1.6% in February 2012, compared with 1.7% in January. The annual growth rate of quoted shares issued by non-financial corporations was 0.3% in February 2012, compared with 0.4% in January. For MFIs, the corresponding growth rate increased from 11.6% in January 2012 to 11.9% in February. For financial corporations other than MFIs, this growth rate decreased from 4.0% in January 2012 to 3.1% in February (see Table 4 and Chart 6).

The market value of the outstanding amount of quoted shares issued by euro area residents totalled EUR 4,291 billion at the end of February 2012. Compared with EUR 4,846 billion at the end of February 2011, this represents an annual decrease of -11.5% in the value of the stock of quoted shares in February 2012, up from -13.4% in January.

*Unless otherwise indicated, data relate to non-seasonally adjusted statistics. In addition to the developments for February 2012, this press release incorporates minor revisions to the data for previous periods. The annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities, they are not affected by the impact of any other changes which do not arise from transactions.*

*A complete set of updated securities issues statistics is available on the "Monetary and financial statistics" pages of the Statistics section of the ECB's website <http://www.ecb.europa.eu/stats/money/securities/html/index.en.html>. These data, as well as euro area data in accordance with the composition of the euro area at the time of the reference period, can be downloaded using the ECB's Statistical Data Warehouse (SDW). The tables and charts accompanying this press release are also available in the reports section of the SDW (<http://sdw.ecb.europa.eu/reports.do?node=1000002753>).*

*Data for the period up to February 2012 will also be published in the May 2012 issues of the ECB's Monthly Bulletin and Statistics Pocket Book. The next press release on euro area securities issues will be published on 14 May 2012.*

Source: ECB securities issues statistics.

1) "Short-term" means securities with an original maturity of one year or less (in exceptional cases two years or less). Securities with a longer original maturity, or with optional maturity dates, the latest of which is more than one year away, or with indefinite maturity dates, are classified as long-term.

2) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

3) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

4) Monthly averages of the transactions during this period.

5) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

2) The residual difference between total long-term debt securities and fixed and variable rate long-term debt securities consists of zero coupon bonds and revaluation effects.

3) As a full breakdown of net issues into gross issues and redemptions may not always be available, the difference between aggregated gross issues and redemptions may deviate from the aggregated net issues.

4) Monthly averages of the transactions during this period.

5) Annual growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The annual growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions.

1) Corresponding ESA 95 sector codes: MFIs (including Eurosystem) comprises the ECB and the national central banks of the euro area (S.121) and other monetary financial institutions (S.122); financial corporations other than MFIs comprises other financial intermediaries (S.123), financial auxiliaries (S.124) and insurance corporations and pension funds (S.125); non-financial corporations (S.11); central government (S.1311); other general government comprises state government (S.1312), local government (S.1313) and social security funds (S.1314).

2) Three-month annualised growth rates are based on financial transactions that occur when an institutional unit incurs or redeems liabilities. The three-month annualised growth rates therefore exclude the impact of reclassifications, revaluations, exchange rate variations and any other changes which do not arise from transactions. The rates are annualised to allow direct comparisons with annual rates (please note that the non-adjusted rates presented in Table 2 are almost identical to seasonally adjusted annual rates).
